EXPERIENCE

FOUNDER/DEVELOPER *Mar 2020 - Current*

Silky Studio, White Plains, NY | <https://silky.studio>

- Founded startup that specializes in cost-effective web development, meeting needs of end-users with easily maintained products and proven results.
- Directing development, implementation, and management of products and services.
- Forecasting expected client demands and creating plans to accomplish objectives while maintaining budgets and maximizing customer satisfaction.
- Leveraging knowledge of back-end and front-end design to manage end-to-end website development projects. Completion of technical development and tasks to meet client specifications and goals.
- Reduced overhead costs by renegotiating contracts with current service providers to more favorable pricing structures. Propelling business forward with modern and innovative strategies focused on appealing to small businesses and startups.
- Mentor for UCONN and Columbia University's 2U coding bootcamps.

WEB DEVELOPER *Mar 2016 - Current*

Trail's Head Analytics, White Plains, NY | <https://trailshead.com>

- Researched and designed search engine provider and hyperlink management system available as a PWA and native android application. Development of user-friendly UI, API to integrate top website data from Amazon's Alexa and Similarweb, as well as API to pull images for saved hyperlinks based on hyperlink location.
- Directing front and back-end development and architecture of databases. Creation of data visualizations from data generated from search engine inputs.
- Monitoring and analyzing network traffic. Performing threat analysis, management, and data protection and encryption for end users
- Tech stack including PHP, JavaScript, Ajax, XML, jQuery, AngularJS, Node.js, TypeScript, Python, SASS/SCSS, SQL, on Linux Virtual Server using WHM and cPanel.

FREELANCE WEB DEVELOPER *Oct 2014 - Mar 2020*

- Integration of latest technologies and consultation of most cost-effective technologies to meet client demands, ranging from initial builds and updates, restructuring of products and services, creation of dynamic emails and campaigns, SEO and social media content creation.
- Development using a broad range of frameworks, including Drupal, Joomla, WordPress, CakePHP, Laravel, Django, Magneto, Zen Cart, Shopify.
- Notable examples: <https://blackstoneconnect.com> | <https://designeroptics.com> | <https://hingebio.com>
